

# Senate Bill 272

Approved on October 11, 2015, SB 272 adds a section to the California Public Records Act requiring local agencies to create a catalog of Enterprise Systems by July 1, 2016 with annual updates.

## Enterprise System

A software application or computer system that collects, stores, exchanges and analyzes information that the agency uses that is both of the following:

- A multi-departmental system or a system that contains information collected about the public.
- A system that serves as an original source of data within an agency.

An Enterprise System does not include any of the following:

- Information Technology security systems, including firewalls and other cybersecurity systems.
- Physical access control systems, employee identification management systems, video monitoring and other physical control systems.
- Infrastructure and mechanical control systems, including those that control or manage street lights, electrical, natural gas or water or sewer functions.
- Systems related to 911 dispatch and operation or emergency services.
- Systems that would be restricted from disclosure by Section 6254.19.
- The specific records that the information technology system collects, stores, exchanges or analyzes.

## Requirements

1. Create a catalog of enterprise systems, containing:
  - Current system vendor
  - Current system product
  - System's purpose
  - A description of categories or types of data
  - The department that is the prime custodian of the data
  - The frequency that system data is collected
  - The frequency that system data is updated
2. To make the catalog publicly available upon request
3. To post the catalog in a prominent location on the agency's website

## Exception

If the public interest served by not disclosing the information described clearly outweighs the public interest served by disclosure, the local agency may instead provide a system name, brief title or identifier of the system.

# Municipal Pooling Authority Enterprise System Catalog

Vendor	Product	System Purpose	Categories, Layers or Modules	Custodian	Frequency	
					Collected	Updated
Microsoft	Dynamics GP	Financial System	Accounts Payable & Receivable	Finance	Daily	Daily
